PRO CENTER

THE ULTIMATE SHOP FOR RACERS

ATOMIC PRO CENTERS

Atomic Pro Centers are our competence centers created exclusively for FIS members and race enthusiasts, from junior racers to World Cup competitors. You'll quickly discover it's not just the gear that makes these places special. Our experienced alpine race technicians will work with you to find the perfect ski set-up.

Our main Atomic Pro Center is located at the Atomic global headquarters in Altenmarkt, on the same site as our ski production and R&D facilities. Besides, there is also an Atomic Pro Center at SNO in Oslo and over 30 Atomic Pro Center Partners worldwide.

RACING SERVICES

Experts with World Cup experience will share our top-end racing equipment with you and build your own individual set-up. It enables racers on the way up to experience the unique service enjoyed by our top Atomic stars – from having their skis tuned in our Race Department with Wintersteiger equipment to having their boots professional fitted by our Atomic race technicians.

APPOINTMENT

Racing services are available in Altenmarkt and Oslo, and any of our Pro Center partners in your region. To make sure we have enough time for individual service, please book an appointment in advance.

Please find our Atomic Pro Center and Pro Center Partners listed on the back page of the catalog.

GUESS WHO SAID WHAT!

- 1 My best buddy in the World Cup is Adrian Sejersted.
- 2 I listen to Taylor Swift before the races.
- 3 My favorite Austrian word is "Gewaltig."
- 4 My favorite chairlift buddy is Babi (my serviceman).
- 5 My lucky charm is the teddy bear I got from my son.
- 6 My most used emoji is the thumbs-up.
- 7 My favorite Austrian word is "Ausgezeichnet."
- 8 My favorite candy is chocolate.
- 9 My most used emoji is the burning heart.
- 10 I am talent-free except for skiing.
- 11 I bring my own pillow to every World Cup stage.
- 12 Mark Zuckerberg is the most famous person in my contact list.
- 13 My favorite World Cup stage is Beaver Creek.
- 14 Sofia Goggia is the most famous person in my contact list.

JUNIORS TO CHAMPIONS

ONCE A JUNIOR,
FOREVER A CHAMPION

JTC

Supporting young, up-and-coming athletes with high-quality equipment, as well as tuning and boot fitting, has always been a top priority for Atomic. But now we're taking junior development to the next level with "Juniors To Champions", our new exclusive coaching program.

More than 60 years of experience in racing, combined with our close relationship with world-class athletes, means we know that it takes to become a professional skier: physical conditioning, mental strength, regeneration, nutrition, the perfect skis, boots, and goggles – not to forget the skills to tune those perfectly to any snow conditions.

With Juniors To Champions – or JTC – we'll support our aspiring young athletes from U12 to U18 in all these aspects of ski racing by providing access to our network of World Cup-tested experts. And prepare them for the rigorous demands of professional sports.

Sounds promising, right?

So, how do we do it? Well, our target group are digital natives, so what better way to reach them than through their electronic devices?

Broadcast directly from the Atomic office, we host monthly online calls with all our juniors dealing with questions like how to stay focused on a race day, how to warm up properly, and how to store your skis over summer. What begins with boys and girls sitting individually in front of their devices quickly turned into JTC watch parties where everyone gets together in front of one phone or laptop. The ultimate aim is to build a deep sense of community among junior racers.

Getting the JTC spirit on snow

While expanding knowledge at such a young age is great, racers want to race – and a coaching program wouldn't be complete without training sessions on the white, cold gold we all love. But we want JTC to be unique and different and

ordinary "Let's all get better" camps won't cut it. Instead, we want our juniors to truly get used to skiing at speed, all while testing new skis and lengths.

The big advantage of getting these proteges on snow is that we can involve them in prototype tests and get feedback straight away. This enables us to react quickly and effectively. The new ICON binding is just one of many chapters of this story.

Through all these initiatives, we bring our juniors one step closer to success, both on and off the race course. And from time to time, we'll reward outstanding performances with exclusive access to World Cup races, including hallowed access to the treasury of success – the wax cabins of our service crew.

The Red(ster) line in a skier's career

With JTC, we want to make Redster a name that racers can rely on from U12 right up to World Cup level. Over the course of a career, coaches and teams may change. But once you've skied on a Redster, we do our best to make sure that it's with you all the way.

Last but not least, JTC will also add a whole new dynamic to our Atomic Pro Centers and Pro Center Partners, which have been serving as competence centers for equipment and racing service for many years.

All in all, this makes Atomic's commitment to junior racing pretty darned unique.

JR ALLROUND

REDSTER SKI TECHNOLOGY

CONSTRUCTION

REVOSHOCK S

Utilizing a series of spring steel modules each encased in impact absorbing elastomer, the revolutionary Revoshock S technology acts like a built-in suspension system for your skis to block distracting shocks before they reach your feet. Whether you're straight-lining groomers or making fast turns at your limit, the race-proven Revoshock S provides a smoother, more precise run. But Revoshock S doesn't just absorb impacts — it rebounds them.

From your ski tip to the binding plate, each spring steel module works in harmony to turn wasted energy into valuable acceleration out of the turn. And because a vibration-free ski leads to a more confident skier, you'll find yourself pushing harder and faster than ever before.

TOPSHEET

Redster Revoshock turns unwanted shocks into confidence-building stability and unparalleled acceleration. Structured topsheet: A structured topsheet massively increases durability and gives a high quality finish.

BASE

World Cup Base Finish
World Cup-level grinding means less friction and more speed.

SIDEWALLS

FULL SIDEWALL

Full sidewall runs across the full length of the ski for precise steering.

DURA CAP SIDEWALL

Sidewall from base to top sheet, for controlled power transmission and great edge grip. The rounded shape of the Dura Cap is a fantastic durability feature as it picks up fewer dents and dings.

CORE

ULTRA POWER WOODCORE

Made from strong beech and lightweight poplar — for supreme running stability and agility in our racing skis.

POWER WOODCORE

A sporty, dynamic ash and poplar woodcore that adds a ton of stability and dampens vibrations at speed.

LIGHT WOODCORE

Made from Poplar wood, this core optimizes the ski's weight without sacrificing any shock absorption or stability.

DENSOLITE CORE

A foam core that's agile and dampens vibrations — for effortless skiing.

LAMINATE

ULTRA TI POWERED

Our World Cup, athlete-proven technology Ultra Titanium Powered with updated double bonding is a Titanal laminate that runs from sidewall to sidewall adding stability, torsional rigidity and edge grip.

TI POWERED

A Titanal layer above and below the core creates supreme shock absorption, strong running stability and high torsional flex.

EDGE ANGLES

SIDE EDGE ANGLE

Precisely tuned edges are an important part of ski performance. A dull edge cannot penetrate the snow surface and will skid through a turn. An edge that is too sharp will grab and catch the snow surface creating unstable performance. Our skis are prepared with a side edge angle of 87.0° for more intuitive handling, easier skiing and better grip on hard snow and ice.

BASE EDGE ANGLE

All skis from our factory are delivered with steel edges that have been carefully machined with a precise base edge bevel for specific performance characteristics. For our FIS skis we're using base edge angles from 0.5° (SL) to 0.8° (GS and JR) and 1.0° (SG and DH). They lightly lift the ski edges off the snow for easy turning while maintaining excellent edge grip and aggressive tracking throughout the turn.

ICON FAMILY

ICON WC 30/24

The Icon loved and trusted by our World Cup athletes. A podium winner in all disciplines, its centralized power transmission delivers the highest levels of performance, agility and responsiveness.

ICON RS 16/12

The Icon for athletes on their way to the World Cup! As well as masters and other strong racers. It has the same centralized power transmission as its big brother – Icon WC – tailor-made for racing through the age groups.

ICON 12/10

The Icon for youngsters starting to get serious! It delivers the perfect weight and performance levels for children and juniors competing mainly in SL & GS – helping them stay in total control of their skis.

RACE BINDING TECHNOLOGY

ICON

CENTRALIZED POWER TRANSFER

A wider base plate and race mounting pattern strategically position the binding screws directly under the boot to centralize and optimize power transmission. Delivering immediate power underfoot while allowing for more reactivity and response throughout the entire length of the ski. Centralized Power Transfer enables the racer to be in better control of the ski throughout the turn – in every discipline and type of course setting.

METAL RACE PEDAL

Designed to deliver the best power transfer from boot to binding, Metal Race Pedal allows the boot to sit directly on the AFD for more direct energy transmission.

ELEVATED BRAKES

Our Elevated Brakes get up and out of the way, tucked in closer to the heelpiece of your binding, letting you ski more aggressive edge angles with less risk of catching the snow.

AUTOMATIC TOE ADAPTION

The toe adapts automatically to your alpine normed boot height and width and ensures constant release values, even on worn out boots.

REDSTER FAMILY

REDSTER STI

This highly anatomical 93mm narrow last is the lowest volume fit and has the ideal stability and stiffness for lighter racers.

REDSTER TI

This highly anatomical 95mm narrow last is the most successful race boot in the modern era and the current choice of most of our World Cup athletes.

REDSTER CS

This narrow 96mm last features more space in the forefoot and navicular areas for increased comfort while still retaining optimum foot hold for powerful skiing.

THE REDSTER THREAD

Consistent liner constructions across all 3 fits

Same forward lean and ramp angle across all 3 fits

Same stance in all 3 fits

CANTING ASSESSMENT SYSTEM
AM5006331001
To know which amount of sole canting is right for your customer, we developed the Canting Assessment System. Precision machined from billet aluminum, it is incredibly accurate and delivers consistent, repeatable results. The plate angle that you select is the angle that you set the boot up to. Plates range from 0.0° - 3.0°, every half degree.

ATOMIC CANTMATE SYSTEM
AM5007781001 80 cm wide x 38 cm deep x 73h cm high
Cantmate elegantly combines sole canting, ramp angle adjustments and toe & heel routing into one tool, efficiently maximizing available workspace. Precision milled from aluminum in Sweden & tested with calibration equipment from Zeiss, it can plane a sole in increments of 0.25°. Items included: Cantmate device, Festool router, cutting bits, ISO 5355 height gauge and digital angle cube.

REDSTER BOOT TECHNOLOGY

MIMIC PROFESSIONAL

Mimic Professional injects advanced foam compounds into revolutionary Mimic liner technology to create a customized fit that forms around the exact shape of the foot. The result is a liner that delivers the supreme fit, unrivaled comfort, and next-level performance.

1. HEAT THE MIMIC ZONES IN THE OVEN

2. INJECT PROFESSIONAL FOAM INTO THE LINER

3. MIMIC: NEXT-TO-SHELL FIT; PROFESSIONAL FOAM: NEXT-TO-FOOT FIT

PROFESSIONAL DUAL STRAP

The innovative Professional Dual Strap combines two elements together for secure, balanced performance. Elastic shock absorbing portion smooths out choppy terrain and increases damping while static section provides pure power and energy transmission.

V³ TONGUE SYSTEM

Customizable V³ Tongue System allows you to select the ideal tongue thickness to suit your needs. Choose between the thickest Low Volume (LV) fit, the medium thick Medium Volume (MV) fit and the thinnest High Volume (HV) fit for the ultimate interface between shin and liner.

PROGRESSIVE RACE SHELL

Our Redster TI and CS boots feature a special shell made from thicker but softer material. This provides a more progressive flex and better damping, plus a more supple feel – making it easier to ski aggressively in all conditions and on all courses.

3D STRETCH TOE BOX

Asymmetrically shaped for left and right, the new 3D Stretch Toe Box takes first fit and customization potential to the next level. Its 'Big Toe Friendly' construction maximizes the liner's available length allowing for a little extra stretch when important millimeters are required to achieve the perfect fit.

REDSTER HELMETS TECHNOLOGY

SURPREME PROTECTION

AMID

AMID stands for Atomic Multi-directional Impact Deflector and is our own development. It's a revolutionary dual-density foam system which is fixed to the helmet's core and free to move in all directions. This means better protection against impacts from all directions – as the foam cushions energy right at impact, then continues to deflect energy away from the head through its movement. By absorbing energy through the whole impact, it provides a new level of protection, whether the impact is high speed or low speed, direct or angled.

INSTANT FIT

360° RS FIT SYSTEM

The 360° RS Fit System lets you tailor your helmet to exactly your head shape, size and height. For an extra layer of fine-tuning, it also comes with customizable Live Fit pads on each side of your head that allow you to perfectly fit the helmet to a more oval or round head shape.

360° FIT SYSTEM + LIVE FIT

Live Fit pads form a wide band of memory foam that adapts precisely to your head for an instant individual fit. The progressive height-adjustable 360° Fit System lets you finetune the helmet to your head size – and also your headshape. It's 100% personalized comfort guaranteed for every skier.

RACE CONSTRUCTION

CARBON RACECASE

The handcrafted Carbon Racecase is supremely stiff, strong and super light. Featuring a multi-directional layup for unrivaled protection and structural stability, it's specifically designed for racing.

ABS RACECASE

The injection-molded ABS Racecase is a stiff and strong shell, designed for guaranteed protection when skiing at speed.

PC RACECASE

Our super durable PC Racecase delivers world-cup level protection. It's a strong outer layer that provides protection from the high impacts you can get while racing, including hitting gates at speed.

SEE BETTER. SKI BETTER.

With over two million working parts, the human eye is the most complex sensory organ of all. And to ensure a clear line of sight in even the most extreme mountain conditions, Atomic lens technology is just as advanced. As skiers ourselves, we know what skiers need, and we know that it all starts with clear vision. Applying our rigorous technical approach, we've designed, tested and perfected our goggles to help you progress, with HD lens tech to enhance color and contrast in all conditions.

HD LENS TECHNOLOGY

Engineered at our design center in Austria, HD lens technology is a proprietary innovation from Atomic that provides incredible depth perception for crystal clear vision in all light conditions. As skiers ourselves, we know from experience that flat light reduces confidence by making it harder to pick out variations in terrain. We developed our HD lens technology to dial up color, contrast and clarity like never before. Micro-crystals within the lens divide white light into its six spectral colors, enhancing the sensitive red and blue ones to radically improve depth perception, reduce eye fatigue and build your confidence in all conditions.

FRAME TECHNOLOGY

DIFFERENT FRAME SIZES

As well as different styles, our goggles come in different frame sizes. Ready to fit all face shapes.

SEALED LENS SYSTEM

The new Seald Lens System shuts out wind and water so even on powder days your goggles stay airtight: zero moisture, zero fogging, max visibility. It also allows you to switch lenses easily when needed.

* no tolerance / ** – 5cm tolerance						

For masters athletes the ski length is a recommendation (except SG)! No restrictions regarding length, width and radius for women above 55 and men above 65!
The FIS recommendations and rules for ski length, radius and profile width can be found in the current FIS Specifications for Competition Equipment! (www.fis-ski.com)

REDSTER FIS USER RECOMMENDATIONS 2024 (SKI, BINDING, BOOT)

Ski selection of FIS products, both length and model, will be always very individual and a subjective decision. We noticed some common trends and following chart should help you to make the right decisions. The optimal skis FIS model and length is determined by the ability, the weight and also the strength of the user.

AGE	WEIGHT (kg)	WEIGHT (lbs)	SLALOM	LENGTH (cm)	BINDING	GIANT SLALOM	LENGTH (cm)	BINDING	BOOT
